BILANCINI IN MONOTRAVE REGOLABILI

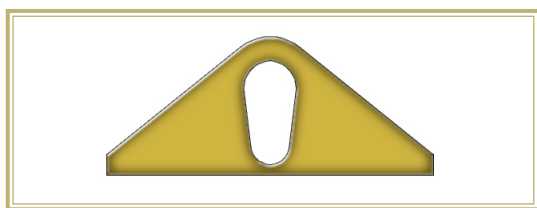

Agganci superiori

**A**

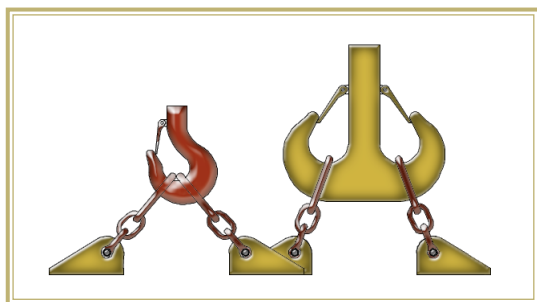

Aggancio superiore per gancio ad ancora con perni sfilabili. Questo tipo di aggancio permette di ridurre al massimo l'ingombro in altezza del bilancino.

**B**

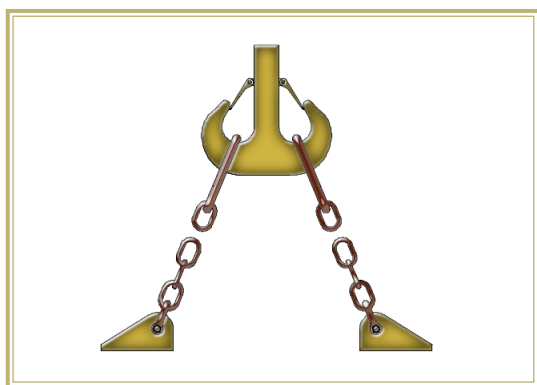

Aggancio superiore per gancio semplice con perno sfilabile. Questo tipo di aggancio permette di ridurre al massimo l'ingombro in altezza del bilancino.

**C**

Aggancio superiore per gancio semplice. Questo tipo di aggancio permette di ridurre l'ingombro in altezza del bilancino.

**D**

Aggancio superiore per gancio ad ancora o semplice con grilli maglia di giunzione e campanelle. Questo tipo di aggancio permette di ridurre l'ingombro in altezza del bilancino senza avere la necessità di smontare nulla.

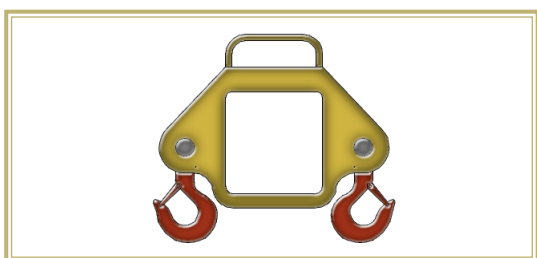

**E**

Aggancio superiore per gancio ad ancora o semplice con grilli maglia di giunzione catena e campanelle. Questo tipo di aggancio permette di aumentare la stabilità del bilancino. Gli attacchi sono saldati ad una larghezza di circa 1/3 della lunghezza del bilancino.

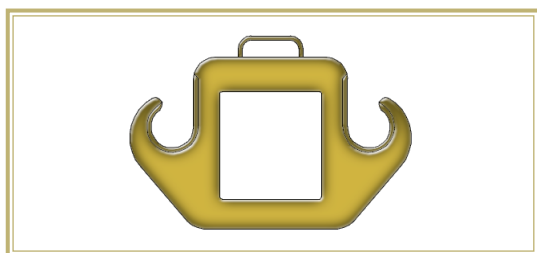

Agganci inferiori

**P**

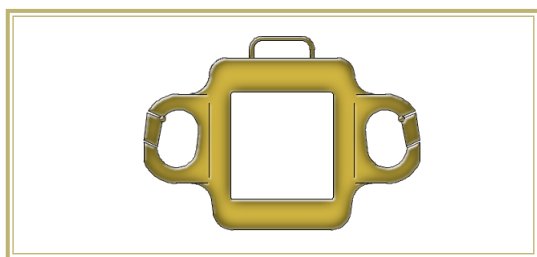

Aggancio inferiore con gancio girevole.
Questo tipo di aggancio permette l'aggancio con imbracature di diversi modelli.

**Q**

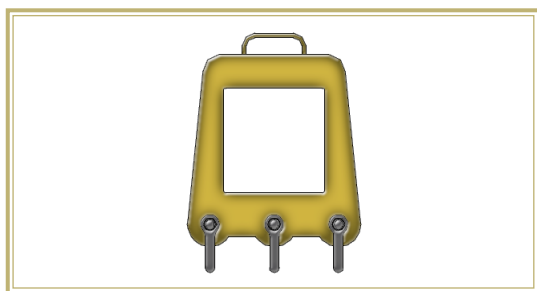

Aggancio inferiore con doppio gancio semplice.
Questo tipo di aggancio permette l'aggancio più agevole delle imbracature.

**R**

Aggancio inferiore con doppio gancio aperto.
Questo tipo di aggancio è costruito appositamente per nastri e anelli in poliestere.

**S**

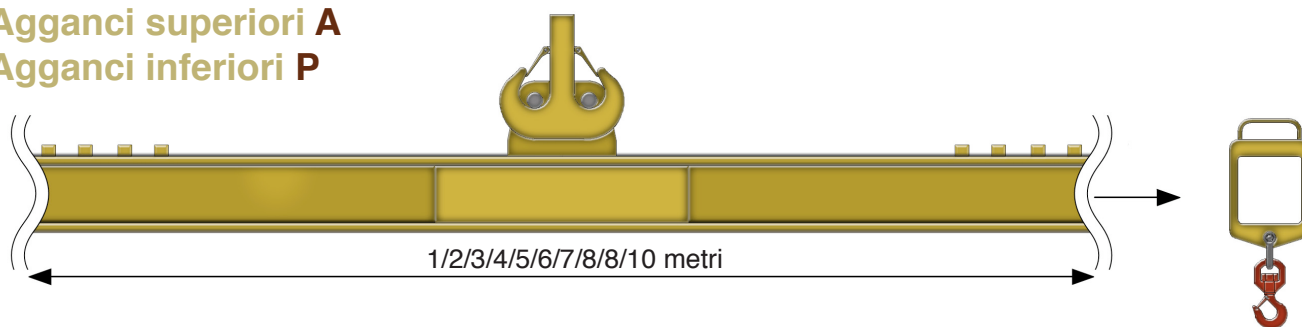

Aggancio inferiore con doppi ganci saldati.
Questo tipo di aggancio permette di ridurre al massimo l'ingombro in altezza del bilancino.

**T**

Aggancio inferiore con tre fori completi di grilli.
Questo tipo di aggancio consente di accessoriarlo con tre bracci di catena provvisti di eventuali accorciatori e ganci.
È indicato per fasci di tubi e fasci di tondino.
